"This is a band that thinks music should be real, should be live and should reach people. They haven't got a message, other than enjoy yourself and let your feet do the talking. You can call the music rock and roll, funk, soul, rhythm & blues, or even country."

- Beatwire.com (Jun 03, 2008)

"Celebrating the common man is exactly what much of this music does, as all good rock and soul should. The title track is a hymn for the working people of America, sounding like Bruce Springsteen if he was backed by the Blues Brothers."
